Sign up form for Email Subscribers

**COST**  
**\$2,500/set up**

## Automated Investor Dashboard

The investor center stands as the primary destination for visitors to any ASX-listed company's website. Yet, manually uploading essential announcements, latest news, video presentations, and reports can prove both time-consuming and financially burdensome in administrative costs. Given the ongoing market volatility, ensuring timely dissemination of crucial information to shareholders is paramount. Thus, IRM is delighted to introduce our latest solution: the Automated Investor Dashboard.

As a bonus, media Proactive interviews, editorial and key ASX announcements can be instantly distributed to an email subscriber base once approved from the ASX portal, or published on the global Proactive platform.

For as little as **\$330 per month** you can automate the number 1 most visited page on any website, without the time resource of manually uploading information.

### ADDITIONAL FEATURE

Use this Video Icon Widget to get your CEO to record a CEO Chat that directly announces the ASX Announcement and can be added to your ASX Announcement page seamlessly. This will engage with your Investors directly as your company will be speaking directly to your current Shareholders and potential Shareholders.
